84	**Kandy Korn** F1	Yellow	9 in.	Fresh eating	Red-purple husks	8+ ft
86	**Argent** F1	White	8.5 in.	Freezing, canning	Wide disease package	8 ft

Sweet corn

Picked fresh for the table. Sugar type sets sweetness and how long ears hold.

Dent & flint

Dried on the stalk for cornmeal, grits, polenta and grain.

Flour & popcorn

Soft-starch flour corn for tortillas; hard popcorn for popping.

Ornamental

Colorful ears and broom corn for fall décor and crafts.

Sugar types and F1, ORG, HEIR and AAS tags are explained on page 4.

Days are from direct seeding to harvest: fresh-eating stage for sweet corn, dry ears for the rest. A dash means not published.

Sweet Corn Sugar Types

SU Normal sugary: classic corn flavor; eat or freeze soon after picking.

SE Sugar enhanced: sweeter and more tender; no isolation needed.

SH2 Supersweet: sweetest and holds longest; isolate from other corn.

Syn Synergistic and triple sweet: SE tenderness with SH2 sweetness.

Planting

Sow 1 in. deep once soil is 60°F (65°F for supersweets). Plant in blocks of 4 or more short rows, not one long row, for full ears.

Isolation

Keep supersweet (SH2) corn 250 ft from other corn, or time plantings 2 weeks apart, so pollen does not make kernels starchy.

Harvest

Pick sweet corn when silks are brown and a kernel squirts milky juice. Let dent, flour and popcorn dry fully on the stalk.

Peaches and Cream

Bloody Butcher

Variety Notes

F1 Hybrid seed

ORG Certified organic seed

HEIR Heirloom, open-pollinated

AAS All-America Selections winner
