105	**Cushaw Green Striped**	White, green stripes	10–20 lb	Vining	—
110	**Iran**	Silver-green to salmon	Up to 50 lb	Vining	—

Days are from direct sowing to mature fruit. Harvest before hard frost, when the rind resists a fingernail and the stem turns corky. Leave 2–3" of stem attached.

Sow

Direct sow 1" deep after frost in 70°F soil, or start indoors 3–4 weeks ahead. Count back from first fall frost.

Cure & store

Cure 10–14 days at 80–85°F (skip for acorn and delicata), then store cool and dry at 50–55°F.

Watch for

Squash bugs, vine borers and powdery mildew. Row cover until bloom and PM-resistant varieties help.

Red Kuri

Butterscotch PMR

Disease Resistance Codes

DM Downy mildew
PM Powdery mildew

Variety Notes

AAS All-America Selections winner
ORG Certified organic seed
HEIR Heirloom, open-pollinated
