Zone 3 Planting Schedule

Zone 3 is the coldest of all the USDA Garden Zones in the United States! This Zone has the shortest growing window for gardening. With a last frost date of **May 15th** and a first date of **September 15th**, the annual minimum temperature for Zone 3 is -30° F.

*These dates will vary a week or two, so it is important to watch the weather before planting.

Using the planting schedule below will help you get the most of your garden. Starting seeds indoors before your last frost date will give you a jump start on the growing season. Knowing when to transplant seedlings outdoors will help to maximize your harvest.

Use your last and first frost dates to [calculate your planting schedules](#).
