

URBAN FARMER

LOVE THE EARTH

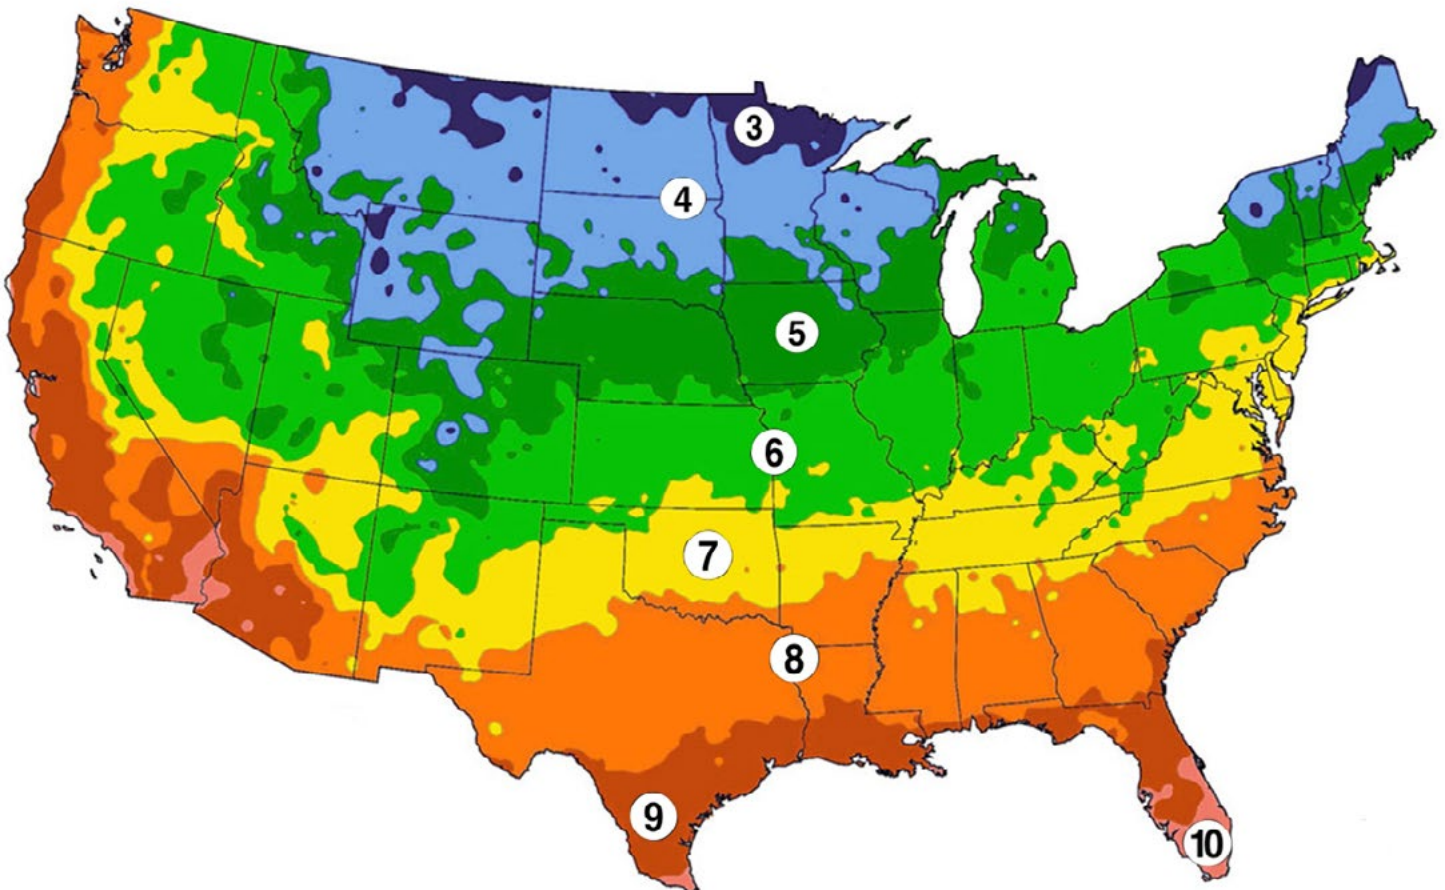

Zone 5 Planting Schedule

Zone 5 has a medium length growing season. Most vegetable varieties will have no problem maturing before your first frost date! With a last frost date of **May 15th** and a first date of **October 15th**, the annual minimum temperature for Zone 5 is -15° F.

Using the planting schedule below will help you get the most of your garden. Starting seeds indoors before your last frost date will give you a jump start on the growing season. Knowing when to transplant seedlings outdoors will help to maximize your harvest.

*These dates will vary a week or two, so it is important to watch the weather before planting.

Use your last and first frost dates to [calculate your planting schedules](#).
