

URBAN FARMER

LOVE THE EARTH

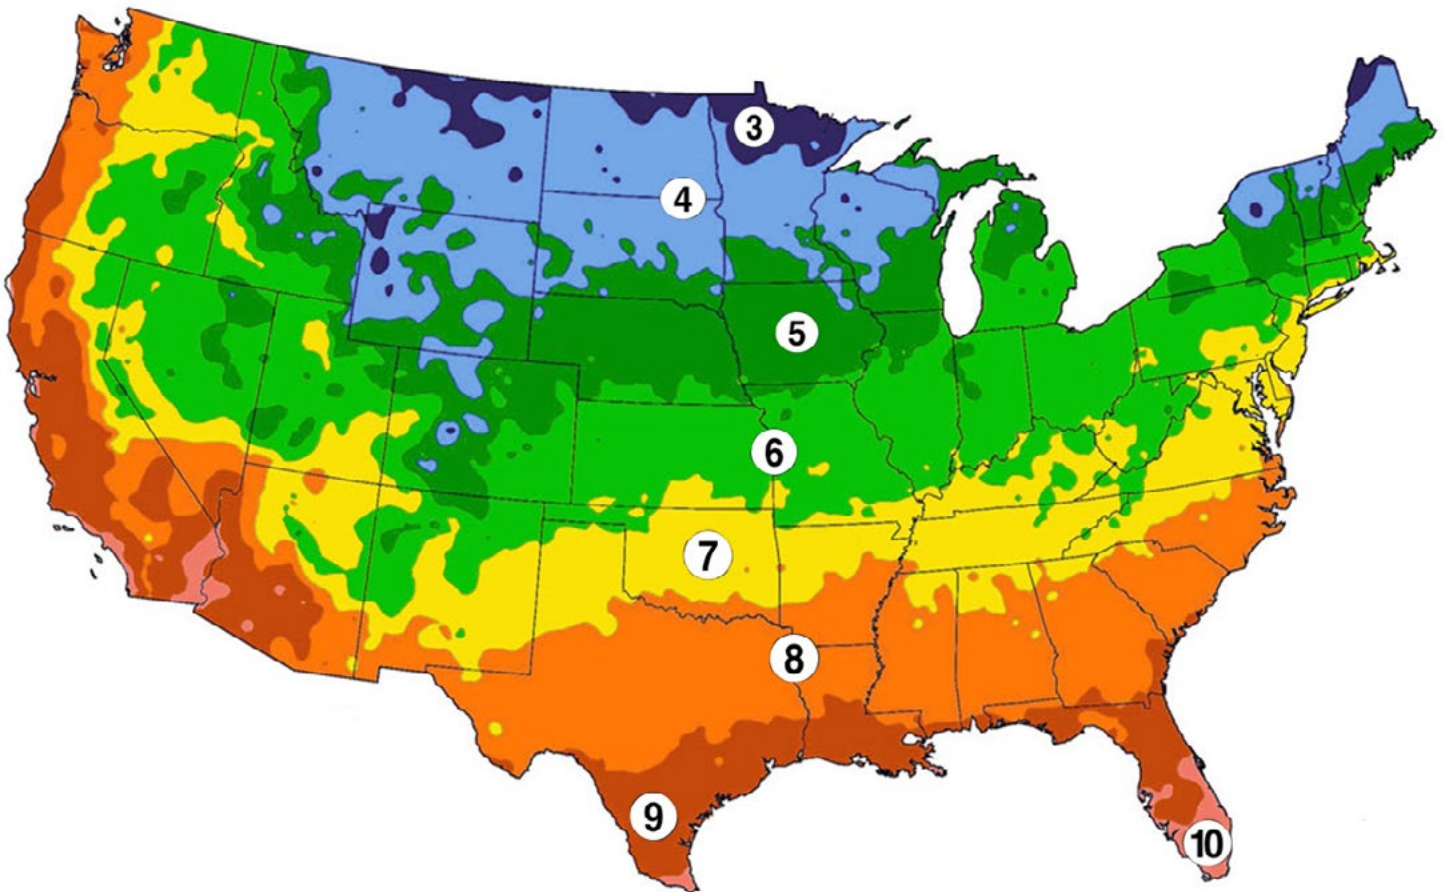

Zone 9 Planting Schedule

Zone 9 has a long growing season with hot summers. Most vegetable varieties will have no problem maturing before your first frost date! With a last frost date of **March 1st** and a first date of **December 15th**, the annual minimum temperature for Zone 9 is 25 °F.

*These dates will vary a week or two, so it is important to watch the weather before planting.

Using the planting schedule below will help you get the most of your garden. Starting seeds indoors before your last frost date will give you a jump start on the growing season. Knowing when to transplant seedlings outdoors will help to maximize your harvest.

Use your last and first frost dates to [calculate your planting schedules](#).
